British Horse Society

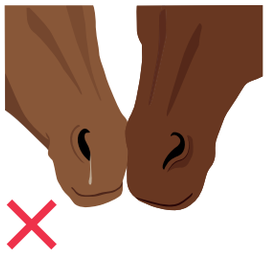

How you can help prevent the spread of equine disease

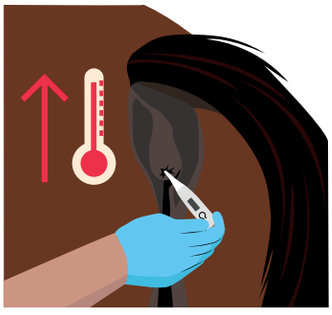

Vaccinate and keep them up to date

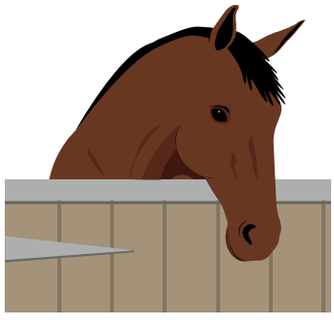

Don't share water sources away from the yard

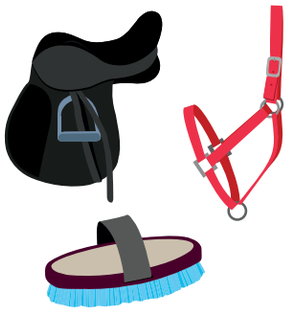

Prevent contact off your yard

Increase in normal temperature could indicate a horse isn't well

Unwell horses may not show signs immediately

Provide each horse with their own equipment

After visiting other yards, where possible, disinfect boots, change outer clothing and wash hands

Clean and disinfect equipment and transport after events

If your horse is unwell, isolate and call your vet

We're here to help
